CNPF actions in relation to fire risks Feedback on the management between fire risks and environmental issue

Haimad Baudriller-Cacaud
Forest Engineer

CNPF actions for fire risk

Some principles

- Fire risk is a question of global management / global scale
Local scale = forest owner property
- Manage fire risk \neq Manage forests and its ecosystem

Place firefighters
efficiently

Implement sustainable
management

Objectives

CNPF actions for fire risk

Public policies
of forest protection against fire
(state authorities, Fire Department,
forests organizations)

CNPF

Sustainable management
issues : economy,
biodiversity, landscape,
hunting, grazing, visiting, ...
(public organizations, users)

Private Forest
owners

Development Actions – managing together

CNPF actions for fire risk

If a fire occurs ...

Fire risk and environmental issue

Some examples ... to illustrate a lack

When a space is concerned by multiple issues

*Hermann
turtle*

*Protected at french, european
and international scale*

National
Nature
Reserve

Fire risks services
(Local and state
authorities)

*You kill
turtles
!!!!*

*We have
opened
landscapes with
our tractors. It
is good for
turtles !*

*Let us work to
protect forests
and people !*

... No action ...

Fire risk and environmental issue

Some examples ... to illustrate a lack

When a space is concerned by multiple issues

*Hermann
turtle*

*Protected at french, european
and international scale*

Fire risk and environmental issue

Some examples ... to illustrate a lack

When a space is concerned by multiple issues

*Rocky inlets of
Marseille, Cassis*

*Beautiful landscape with a rich
biodiversity – Classified site*

*You can not
modify this
landscape.*

State
authority in
charge of
landscape

Fire risks services
(Local and state
authorities)

*We have to
open a fire road
to protect
forests and
people !*

... No action ... and a fire occurs ...

Fire risk and environmental issue

Some examples ... to illustrate a lack of rules

Some new events : 2022

Big fires in the south west of France and in many regions unaffected to that point

New forest law from 10/07/2023

Fire risk is more important

Perhaps another perspective

Talk together locally, go on the field and find solutions

Thank you for your attention
